 [Sherif Okunade](#)

Summary

Experienced Senior Software Engineer with a strong focus on backend and full-stack development. Skilled in designing and building scalable, high-performance systems using Node.js, TypeScript, Express, NestJS, React, and Next.js. Proven experience delivering production-grade APIs, microservices, and data-intensive platforms across fintech, legal tech, logistics, and hospitality domains. Strong background in PostgreSQL, MongoDB, Redis, caching strategies, and API design. Passionate about clean code, performance optimization, and building reliable systems that scale.

Experience

Peerless Software January 2024 - till date
Software Engineer Lagos,Nigeria

 <https://bepeerless.co>

- Developed and maintained backend services for Sterling Bank's core banking platform (SEABAAS).
- Built secure REST APIs using Node.js, Express, and TypeScript, enforcing authentication, authorization, and strict validation.
- Designed and optimized PostgreSQL schemas and queries for high-volume financial transactions.
- Implemented structured error handling, logging, and monitoring for mission-critical systems.
- Collaborated with cross-functional teams on API contracts and third-party integrations.

Tools: Node.js, Express, TypeScript, PostgreSQL

Lawpavilion April 2023 - December 2023
Senior Software Engineer Lagos, Nigeria

 <https://lawpavilion.com/>

- Architect and develop scalable backend services using Node.js, Express, and TypeScript for legal technology platforms.
- Design and maintain RESTful and GraphQL APIs supporting document management, contract analysis, and AI-powered features.
- Implement secure authentication, authorization, and validation mechanisms for handling sensitive legal data.
- Optimize database queries and caching strategies using PostgreSQL and Redis, improving system reliability and performance.
- Collaborate with frontend, ML, and product teams to define API contracts and backend architecture.
- Drive backend best practices, code quality standards, and technical decisions across the team.
- Mentor junior engineers on API design, system architecture, and Node.js best practices.
- Containerize and deploy services using Docker.

Tools: Node.js, Express, TypeScript, PostgreSQL, Redis, Docker

Innovacao January 2023 - April 2023
Full-stack Engineer Lagos, Nigeria

- Architected backend services for a food service and hotel management system using Node.js, Express, and NestJS.
- Built RESTful APIs and microservices for bookings, inventory, orders, and customer data.
- Designed and optimized MongoDB schemas for real-time, high-volume operations.
- Integrated payment gateways (Flutterwave, Paystack) with robust transaction handling.
- Implemented real-time updates using WebSockets.
- Applied caching and performance optimizations to support peak usage.

Tools: Node.js, Express, NestJS, MongoDB, WebSockets

AccountableTechServe June 2022 - December 2022
Full-stack Engineer Lagos,Nigeria.

 <https://www.accountable.global>

Built Core Frontend for "MONEHQ" | Managed Express.js and GraphQL Backend

- Single-handedly developed the core frontend of "MONEHQ," a feature- rich accounting software, using Nextjs, delivering a sleek, user-friendly interface.
- Designed and optimized key UI components for financial data management, improving usability and client satisfaction.
- Inherited and maintained the backend of Accountable's in-house application built with Express.js and GraphQL, ensuring smooth performance and timely updates.
- Enhanced API integrations and resolved bottlenecks in the backend service, boosting the application's overall efficiency.
- Worked closely with stakeholders to implement new features, troubleshoot issues, and refine both frontend and backend systems.
- Delivered clean, maintainable code while maintaining high performance and scalability in the systems.

Tools: Javascript Reactjs Express Postgres

Vatebra ltd October 2021 - June 2022
Frontend Engineer Lagos,Nigeria

 <https://vatebra.com/>

- Collaborated with other engineers to build out SAAS applications using an agile methodology.
- Wrote the views for .Net MVC applications, maintaining clean architecture.
- Worked on important features, such as role managements, performance managements and tasks tracking systems.
- Lead a team of interns to build a Memo and Approval system using javascript and .Net
- Implemented designs to build out user friendly applications. Maintained applications and provide support for the applications users.

Tools: Javascript .Net

Projects

NBA Stamp and seal

Legal document stamping platform used by Nigerian Bar Association members for secure document validation.

 <https://estamp.nigerianbar.org.ng>

MoneyHQ

Feature-rich accounting software platform for financial data management and business operations.

 <https://money-hq-shev.vercel.app/>

Accountable

Comprehensive accounting and financial management platform with GraphQL backend architecture.

 <https://www.accountable.global>

Fussy Recruitment

Platform connecting healthcare professionals with vetted job opportunities across the UK.

 <https://fussyrecruitment.co.uk/>

Transglide

International logistics management platform for shipment tracking and partner operations.

 <https://transglide.co.uk/>

Wardboard

A soccer team management application.

Volunteering

RashDevs June 2020 - Till date
Volunteer Team Lead Lagos,Nigeria.

Led Backend Development Teams for Learning Projects

- Led and mentored teams in building backend services and APIs using **Node.js, Express,** and **PostgreSQL**.
- Organized and facilitated coding sessions focused on backend architecture, API design, database optimization, and server-side development.
- Guided teams through backend development lifecycle, from API design and database schema creation to implementation, testing, and deployment.
- Taught best practices in backend development, including RESTful API design, authentication/authorization, error handling, and performance optimization.
- Helped junior developers enhance their Node.js skills through code reviews, pair programming, and structured feedback on backend architecture and patterns.

Skills

OS/Arch

Windows, MacOSx, ARM64

Backend

Node.js, Express.js, NestJS, FastAPI, REST APIs, GraphQL, WebSockets

Databases

PostgreSQL, MongoDB, Redis, Prisma, Mongoose

Cloud & Deployment

AWS, Vercel, Netlify

Languages

Typescript, Javascript, Python

Frontend

React, Next.js, Tailwind CSS, React Query, MUI, Ant Design

DevOps & Tools

Docker, Git, GitHub, GitLab, Jest, Postman

Integrations

Flutterwave, Paystack, OpenAI API

Interests

Software Architecture

Football

Technical Writing

Education

University of Ilorin

Agricultural and Biosystems

Engineering

October 2015 - November 2021

B.Eng.
